EDUCATION

B.TECH in Computer science & Engineering
Gandhi Institute of Technological Advancement /(GITA),Bhubaneswar

06/2020 - Present   *Bhubaneswar, India*

B.TECH (Final year)
- Computer Science & Engineering
- 8 CGPA

Diploma
Bhubanananda Odisha School of Engineering/(BOSE), Cuttack

06/2017 - 05/2020   *Cuttack, India*

Diploma
- Computer Science & Engineering
- Percentage 74

PERSONAL PROJECTS

Realtime Chat / Code Editor Application
- In this **project**, I create a complete Realtime Chat Application. I used HTML & CSS on the front end, with **Node.js** and **Socket**.**io** web socket library on the back end.
- Added Client sided **JavaScript** for the purpose of playing with DOM elements. Used Audio file (ting.mp3) which gives notification on receiving the messages.
- The app must allow multiple users to chat together. The messages must be updated without refreshing the page. For simplicity, we will be avoiding the authentication part.
- https://github.com/hit-man-shu/Real-time-chat-app ⌇
- A **Real-time Code Editor App** Where I used **React Js** for Front-end, with **Node.js, Express.Js** framework, and **Socket.io** web socket library for the web sockets in Back-end.
- https://github.com/hit-man-shu/Real-Time-Code-Editor ⌇

Weather App
- In this Project, I Build a weather app in **react.js** using Open **Weather API**.
- A simple weather app that allows you to get current weather information, based on the city you enter. It Will Show The **Weather forecast for any city or place, Find user location weather by utilizing GeolocationAPI.**
- https://github.com/hit-man-shu/weather-project-app ⌇

Car Racing Game JavaScript
- The **Simple Car Racing Game** was made on an HTML web browser that uses the **JavaScript** engine to improve modern web development capabilities. game is played using a web browser that displays a car and a road.
- The longer you stay on the road, the higher your score will be. If your automobile collides with the Enemy car, the game is finished.
